

BOX OFFICE

Media Intelligence Tool

Social Listening and more

Film Industry & Social Networks

With more than 1500 films produced annually, Bollywood is the world's most prolific cinema industry

Indians being one of the most hyperactive population on social networks can be the key to Box Office Success

Being the most effective channels to reach out, social networks are heavily used to promote movies/series with huge budgets

Measure Digital to Measure Box Office Success

Social Buzz and Search Trends during release week show a 82% correlation with the final box office collection

An average movie release picks 40000 mentions on social in the release week

Netflix latest release Sacred Games had a 4X higher social buzz than any series release in India

Heavy Interactions and tagging of Media content can be measured as social signals and can be used to predict success

Most Brands are not measuring Social Signals

**Only 5% of Media Companies
measure social to gauge
campaign success**

**Every 24 hours, millions of reactions and comments are made on the
Social Networks concerning movies or series, which are left unseen by
industry**

**Competition Search and Online
Social trends are not followed
by most Brand Managers**

DeepFlux Media Intelligence: Start Measuring Success

Campaign Analysis & Predictive Modelling

Track your Campaigns impact on Buzz and Sentiment and derive insights into target audience

Campaign Optimization across platforms from a central campaign management interface.

A hand holding a blue pen pointing at a bar chart titled "Our company". The chart is a stacked bar chart with three series: Receipts (yellow), Sales (teal), and Orders (red). The x-axis represents time in months, and the y-axis represents a numerical value. The chart shows a general upward trend in all three metrics over the period shown.

Audience Discovery feature which helps you get insights into audience and user patterns

A line graph showing a success forecast of a new release. The graph has three lines: a red line, a green line, and a blue line. The x-axis represents time, and the y-axis represents a numerical value. The red line shows a steady increase, the green line shows a fluctuating increase, and the blue line shows a steady increase.
